

TK series HMI User Manual

Thank you for purchasing Coolmay TK series HMI. This manual provides instructions of product characteristics, general specifications, hardware interface and software settings, etc. Detailed programming, please refer to "Coolmay TK series HMI Programming User Manual" TK series HMI main features:

- Resistive touch panel with high precision and reliability
 60,000 TFT true color display, all series support vertical display
- 3、Supports any-format static images and GIF animation 4、Supports all fonts in Windows
- Provide a large number of vector libraries and component libraries
- 6. Button sound and alarm sound can be set by yourself
- 7、Convenient drawing components and full-featured editing components allow users to quickly design screens at will
- 8. Multi-language, support to display multiple languages in the same screen, and have the function of translator
- 9. Multiple communication protocols, support each communication port to connect with multiple controllers

Product Information

- 1. Coolmay product series TK Series HMI 2. Version TK Series : 32bit CPU 408MHz
- 3、HMI size 37: 3.5inch 43: 4.3inch 50: 5inch 70: 7inch 100: 10inch
- 4. Version and cutout Fh: basic version Hd: high resolution version (1024*600) KFH: cutout size is different from FH series
- Except for 3.5inch, other sizes can be added WIFI (will occupy RS485) 5、WiFi

Instructions of HMI connecting with all brand PLC

1. Coolmay CX series

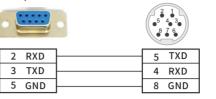

Rs232 connect:

1) TK software setting

parameter	setting
PLC type	CoolMay PLC(3U/3G)/FX3U
COM type	RS232
Data bits	7
Stop bits	1
Sync check	, ,
Communication rate	9600

2) Wiring diagram TK with Coolmay CX series PLC RS232 using "CX2N downloading cable"

TK series HMI side 9-hole Coolmay PLC side D-shaped female socket 8-pin male connector

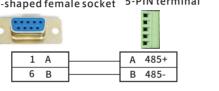

Rs485 connect:

1) TK software setting

,	<u>, </u>			
parameter	setting			
PLCtype	CoolMay PLC(3U/3G)/FX3U			
com port type	RS485			
data bits	7			
Stop bits	1			
Sync check				
communication rate	9600			

2) TK and Coolmay CX series PLC Rs485 communication diagram

TK series HMI side 9-hole Coolmay PLC side D-shaped female socket 5-PIN terminal

Note: TK6037FH Communication cables configuration:

1.used for communication with Coolmay FX3GC series/FX2NC series/DX2N series/Mitsubishi PLC" and DX2N(FX2NC) PLC communication customized cable";

2.used for communication with Coolmay CX3G series/CX2N series/DCX2N series PLC" and CX2N PLC communication customized cable

2 Matsushita Fp series

1) TK software setting

	,	
	parameter	setting
PLC type		Matsushita FP Series
com port type		R\$232
data bits		8
stop bits		1
	Sync check	Odd parity
	communicatior rate	9600

2) TK and panasonic series PLC communication connection diagram

TK series HMI side panasonic PLC side 9-hole D-shaped female socketerminal

3. Xinjie PLC series

1) TK software setting

,			
parameter	setting		
PLC type	Xinjie PLC Series		
com port type	RS232		
data bits	8		
Stop bits	1		
sync check	Even parity		
communication rate	19200		

2) TK with Xinjie series PLC communication diagram

TK series HMI side Xiniie PLC side 9-hole D-shaped female socket 8 pin male connector

2 RXD	5	TXD
3 TXD	4	RXD
5 GND	8	GND

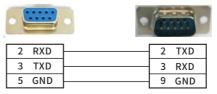

4. Omron C series

1) TK software setting

parameters	setting	
plctype	Omron C Series	
com port type	RS232	
data bits	7	
stop bits	2	
sync check	Odd parity	
communication rate	9600	

2) TK with Omron series PLC communication diagram

TK series HMI side Omron PLC side 9-hole D-shaped female socket9-hole D-shaped male socket

5. Siemens S7-200 series

1) TK software setting

parameter	setting	
PLC type	Simatic S7-200 Series	
com port type	RS485	
data bits	8	
stop bits	1	
sync check	odd parity	
communication rate	9600	

2) TK with S7-200 Series PLC communication diagram

TK series HMI side 9-hole \$7-200 series PLC side D-type female socket 9 -hole round male socket

	_		
1 A		3	485+
6 B		8	485-

6. Mitsubishi FX series

1) TK software setting

parameters	setting
plctype	Mitsubishi FX Series
com port type	Rs232
data bits	7
stop bits	1
sync check	even parity
communication rate	9600

2) TK with Mitsubishi FX series PLC communication diagram using Mitsubishi programmable cables (SC-11)

Pin No	signa	description
1	RXD-	receive negative
2	RXD+	receive positive
3	GND	ground wire
4	TXD-	send negative
5	+5V	External power supply+5V
6	CCS	communication direction control line
7	TXD+	send out positive
8	NC	Empty feet

Programming software Coolmay mView HMI programming software More detail information please refers to <Coolmay TK serires HMI programming manual>

TK series HMI User Manual

-- Please read carefully the related manuals beofre using our products, and us this product under the environmental conditions specified in this manual.

- 1. Power on after confirmed the voltage (24VDC, >18W) and right wiring to avoid damage
- 2. Tighten the screws or the rail while mounting the product to avoid falling off.
- 3. Avoid wiring or plug the cable with electricity, or it Is easy to cause electric shock or circuit damage. When the product emits odor or abnormal sound, please immediately switch off the power. While processing screw holes or wiring, do not drop the metal chips and wire head into the ventilation hole or the controller, which may cause product failure and disoperation
- 4. Ground terminals FG on HMI must right ground connection to improve anti-inerference ability.
- 5. Please do not disassemble the product or modify the wiring. Or it may cause malfunction, loss or fire
- 6. While installing or disassembling the product, ensure to turn off all power. Or
- it may cause malfunction and breakdown.
